25X1 [] ship entered and left Danzig-Neufahrwasser harbor on 29 and 30 May 1953, []
 25X1 [] the number of sentries posted in the harbor area had been con-
 siderably increased and was larger than ever before. []
 25X1 [] five uniformed men who, in addition to the usual two officers and twenty
 men, participated in the searching of the vessel, were ensigns of the frontier guards.
 25X1 On 6 July 1953, when, on arrival, [] ship was searched by three officers and thirty-
 25X1 six other men, [] the searching personnel was increased to rush the
 25X1 searching formalities. On 21 and 29 June 1953, searching was again effected as usual
 by two officers and about 15 frontier guard men.

2. On entering Danzig-Neufahrwasser on 29 May 1953, [] "Nowy
 Port" leading buoy until Finnish merchant ship OESTERBOTTEN had passed the jetty
 heads outgoing, as the harbor entrance to Danzig-Neufahrwasser could not be navigated
 by two ships at the same time. Expansion work on this entrance was under way. 1

3. At about 5:15 p.m. on 29 May 1953, a total of about 50 soldiers and three officers
 were observed on the slope of the Weichselmuende side river bank about 400 meters
 down-river from the hog loading shed. Some of the soldiers held up long battens
 with cardboard figures at their ends, one of which was a tank. The officers wore
 green cap ribbons like the frontier guards who searched source's ship. []
 25X1 [] the whole was a field exercise. On 16 June 1953, heavy rifle and machine
 gun fire, coming from the direction of Westerplatte, was heard all day. There were no
 reports of heavy guns.

4. At 6 a.m. on 6 June 1953, a unit of 26 firemen in olive-green khaki uniforms were hold-
 ing exercises near the fire station on the Neufahrwasser bank of the channel downstream
 from the fuel depot. They marched past a fire service officer who took the salute. On
 18 June 1953, about 30 firemen were seen holding an exercise. Their equipment included
 a motor fire engine and two portable pumps, each drawn by four men. At the beginning of
 the exercise extinguishing foam from the fire engine was sprayed, and subsequently
 changed over to water. When the two pumps were put into operation, each was connected up
 to a suction hose to pump water from the Vistula River. Two firefloats tied up to a
 small landing stage did not participate in the exercise.

5. At 8:20 p.m. on 20 June 1953, an auxiliary warship, about 2,000 GRT, was seen on a westerly course 10 seamiles from the coast in a position Stilo (54°47' N/ 17°44' E) bearing 190 degrees true. This vessel was met again at 1:45 a.m. on 22 June 1953, on a southeasterly course three seamiles off in a position Heister-nest (Jastarnia) (54°42' N/ 18°41' E) bearing 270 degrees true. She passed about 200 meters [redacted] was painted gray, had one smokestack amidships and two guns on the foredeck. No other details could be made out because of darkness. 2
6. At 11:45 p.m. on 28 June 1953, a fleet of nineteen warships lying in a long row and brightly illuminated were seen off Gdynia. The first ship in the row was a large single-stack warship, while a merchant ship-type vessel was moored at the end. Two submarines and some large minesweepers and motor minesweepers also were observed. A Polish longshoreman in Danzig stated that two Polish admirals had been inspecting Polish warships on the occasion of a naval festivity on 28 June 1953.
7. [redacted] ship was on the prescribed swept channel 1, on the stretch between Gdser Rev lightship and Position 7a, several detonations coming from abeam from Warnemuende, were heard. [redacted] they were either reports of heavy guns or were caused by blasting operations. Three to six of these reports were heard at 5:35 a.m., 5:50 a.m., 6:20 a.m., 7:05 a.m., 7:33 a.m., and 7:40 a.m.
